TO DO LIST

UP NEXT

- Camera Op plan with Matt x Freddie
- Connect team to Kelli
- Plan Look meeting with Freddie and Matt
- ~~Roof Access – we have to ask them and use our own ladder~~
- ~~PR person publish in the trades~~
- ~~Camlock conversion and electrical diagram email~~
- ~~Action Camera Rees~~
- ~~AD Rees – Eric x Chris Riddle~~
- Budget with Ashim

DP	\$300	12	\$3,300
Cam Op	\$300	11	\$3,300
1st AC	\$300	10	\$2,700
2nd AC/loader	\$300	7	\$2,100
Camera Rentals	\$1,000	2	\$2,000
Gaffer	\$300	10	\$2,700
BB	\$300	10	\$2,700
Key Grip	\$300	10	\$2,700
G&E Rentals	\$7,500	1	\$7,500

- ~~Official dates x Create calendar~~
- ~~Cam Op interview questions~~
- ~~Shotlist Proposal / Map the sections and beats of the scene and fight. (Nov 18th week)~~
- ~~Gaffer x Electrician (don't need consultation after chatting with Nick)~~

- Review Location Photos
- Text Gaffers x Electricians certified. Electric. Nick
- LUT Test x LUT test send

- Gear List
- Discuss Camera Gear List with Freddie
- Reply Illuminar about mirrors
- Camera Operators — follow up reese and myles (didn't need to follow up)
- Email CRLS or Godox
- Two days off of cam op to go to AG extra day

- Vendor List x Outreach
 - Aputure (Freddie)
 - CRLS (John Roche),
 - Illuminar
 - Nanlux
 - J&G Grip
 - Robert Oliva

- Crew reach out and hire

- Crew Hire

- H264/5 vs. Intra Codecs FX3 / Netflix
- Overhead zones
- Review Stunt video
- Crane for Two days / Or Dolly for the dialogue days with dancefloor. Definitely dolly with boom, ideally telescoping crane.
- **Creative x Script Breakdown**
- **Approach x Etc**
- **References**
- Discuss Action ideas with Yung
- Action Camera Tests with Yung
- Artemis and frame.io upload of materials
- Questions to help with:
 - latse - union or no. Best approach.
 - Standing Set concerns
 - Financial Investors / 2-2.5 million . Current budget \$500
 - Vicki join the team for feature - production stuff

NOTES

G&E - Two weeks - 6 to 8 days of rental

Camera Rentals - 6 days of rental / Prep Dec 2

Have an AD rec.

Have interested crew for all positions

Have other operators to consider, depending on Skyler interview

WOuld love to shotlist (even though stunt has separate shotlist)

We should discuss Crew days and budget. Have questions and concerns.

Rentals

Also, based on current crew size and goal to light more of the set: we'll need more than one day of prelight realistically.

Shotlist

Dialogue x dialogue

6 parts

V-mount

7in monitor

Wireless focus - nucleus.

Mattebox

Gear List - weight is a concern. Lightweight.

Lighting is all here and downstairs.

PRE-PRODUCTION

Creative Development:

- **Read** the script multiple times, focusing on:
 - Story
 - Emotion
 - Subtext
 - Themes
 - Arcs
 - Characters
 - Visual potential
- **Breakdown x Analysis**
- **Review Beats** / Breakdown
- Explore Approaches to Cinematography
- Devise style and visualize approach.
- **Visual References** (photography, art, film stills, lookbooks, etc.) to capture initial ideas and feelings.
- Create a mood board and visual lookbook to develop the film's overall aesthetic.
- Create a style bible with detailed notes: define the film's:
 - Tone (how does the film feel)
 - Aspect ratio, Framing, Lenses
 - Color palette
 - Contrast
 - Desired atmosphere
 - Camera movement styles
 - Pacing
 - Etc
- Determine special gear or crew needs based on creative choices.
- Decide on framing and lensing preferences.
- Develop a **Color Story x Palette** in collaboration with the Production Designer.
- Consider VFX elements and their impact on the visual approach.
- **Create a SHOT LIST in collaboration with the director.**
- Continue talks with director on new ideas and come to agreement on overall vision.

- Help create and approve any storyboards.
- Design (or cause to be designed) and approve any built-in or practical lighting fixture.
- Generate (or cause to be generated) and approve equipment list for camera, electric and grip.
- Check dailies screening rooms for correct standards.
- Estimate and order film stock (type, size, quantity). (Specific to film projects)
- Standardize and create effects bible for show.

Logistical Planning:

- Attend pre-production meetings and casting sessions.
- Scout locations and provide feedback.
- Participate in department show and tells.
- Discuss schedule, budget, and equipment needs with the UPM/LP/PC.
- Determine post-production workflow, resolutions, and deliverables.
- Review contracts and clarify rates, kit fees, and expendables. AGENTS
- Ascertain budget requirements.
- Plot sun position for locations.
- Check local weather conditions.
- Check tide tables near ocean locations (when applicable).
- Review, discuss, and approve set plans.
- Review, discuss, and approve spotting plans for stages.
- Review and approve:
 - Props
 - Picture cars
 - Airplanes
 - Boats
 - Horse-drawn vehicles
 - Mock-ups
 - Miniatures

- Generate (or cause to be generated) and approve rigging and shooting manpower and man-days.
- Assist other departments in getting required equipment, manpower, and tests.
- Check loading of production trucks or cargo containers for location or international shipping.
- Help producer or studio solve any production problems.
- Discuss and be aware of delivery dates for all postproduction. (Post-Production)

Team Coordination:

- Interview potential G&E keys and 1st ACs.
- Hire crew (G&E, camera team, DIT, additional camera operators).
- Conduct camera tests with the chosen camera package.
- Conduct hair, make-up, and wardrobe tests.
- Schedule meetings with gaffer, key grip, 1st AC, and DIT to lock down technical details.
- Communicate regularly with the director and other department heads (Production Design, Wardrobe, Hair/Make-up, VFX Supervisor).
- Discuss needs and expectations with the editor.
- Discuss and come to an agreement with the Production Designer on:
 - Colors
 - Wallpaper
 - Practicals
 - Paint
 - Overall aesthetic
- Discuss and research with technical advisor (when applicable).
- Choose and approve crew, film stock, lab, equipment, second unit and visual effects crews.
- Supervise the manufacture and testing of any new or modified equipment.
- Cast stand-ins. Or be involved.
- Train crew to use any new equipment.

- Walk locations and stages with all departments to discuss requirements.
- Approve:
 - Set colors and textures
 - Costume colors and textures
 - Make-up and hair

LOOK DEVELOPMENT

- Conduct LUT development for both day and night looks (if applicable).
- Create and share a color story document with the Production Designer.
- Fine-tune the visual approach during camera tests.
- Experiment with camera settings, lenses, filtration, and lighting to achieve the desired look.
- Continuously refine the visual style throughout the shoot.
- Consider the use of film emulation techniques in post-production.
- Visit laboratory to: (Film projects)
 - Calibrate, customize, and evaluate exposure system for any combination of electronic or chemical image capture.
 - Establish developing, printing, set timing and transfer protocols.

EQUIPMENT

- Determine camera package based on project needs and budget: (consider film vs. digital, camera type, lenses, filtration, support systems, monitoring)
 - Camera
 - Lenses
 - Filtration
 - Support systems
 - Monitoring
-
- Choose lenses based on desired look, focal length requirements, and compatibility with camera system.
- Select appropriate filtration for desired effects (diffusion, ND, special effects filters).
- Determine necessary grip equipment:
 - Flags
 - Nets
 - Silks
 - Diffusion frames

- Grip clouds
 - Etc.
-
- Decide on lighting package based on budget and creative choices (consider HMI, Tungsten, LED, special effects lighting).
- Choose support systems based on camera movement needs:
 - Dollies
 - Sliders
 - Gimbals
 - Steadicam
 - Jib
 - Crane
 - Car rigging
-
- Request specialty gear (probe lenses, underwater housing, macro lenses, low angle prism, split diopter, etc.) if required.
- Determine media needs and DIT setup:
 - Hard drive recommendations
 - Estimated data storage per hour of footage
 - Transcoding requirements
 - Etc.
-
- Check availability of equipment at rental houses and make necessary orders.
- Create a comprehensive gear list with all equipment details for each department.
- Conduct a thorough gear check-out and prep to ensure all equipment is functioning correctly.
- Visit equipment vendors and explore new equipment.
- Learn how new equipment works.
- Invent (or cause to be invented) special equipment or techniques for the show.

SCOUTING

- Conduct tech scout with key crew members (director, 1st AC, gaffer, key grip) to assess:
 - Lighting
 - Power
 - Camera placement
 - Logistical challenges
- Take photos and videos of locations for reference and planning.
- Evaluate sun path and lighting conditions at different times of day.
- Measure spaces and conduct lens calculations if necessary.
- Discuss any special gear or crew needs based on location challenges.
- Crew

- Gear requests and specialty gear
- Lift, Grip Clouds, Helium, Haze, Fog exterior
- Camera Gear List / G&E gear list and options
- Add low angle prism, filtration, split diopter, etc. Phantom slow mo.

AFTER SCOUT REPORT

Notes go here:

SHOOT PREPARATION

- Review and finalize the shot list with the director.
- Confirm gear orders and schedule pick-ups and drop-offs.
- Create overheads and floorplans for complex scenes (if needed).
- Communicate lighting plans to gaffer and key grip.
- Create a shooting schedule in collaboration with the Assistant Director.
- Discuss specific needs and expectations with camera operators and assistants.
- Brief the DIT on post-production workflow and data management protocols.
- Visit sets under construction.
- Approve wild walls, ceiling pieces and any moving set pieces.
- Check lighting-fixtures crew.
- Reference Style Bible (in folder)
- Consider:
 - Lighting, Color Palette, Contrast,
 - Composition, Aspect Ratio, Negative Space, Centered, Symmetry or NO,
 - Lensing, Atmosphere, Depth, Texture, Details, Environment+Location, Character
 - Movement, Pacing (Intro, Hold, Frenetic)
 - Core Story, Big Picture
 - Visual References
 - beat sheet / character breakdowns / motivation
 - emotion / subtext / themes / arcs / story
 - visual / composition / light / color / mood
 - beats / phrases / sequences
 - scene be scene / shot by shot
 - shotlist
 - techniques / technical / process
 - lookbook

ON-SET TASKS

- Supervise camera and lighting setup.
- Collaborate with the director to finalize shot composition, camera movement, and blocking.
- Determine exposure and ensure proper white balance.
- Work with gaffer and key grip to shape and control light.
- Monitor footage for quality control and continuity.
- Manage time efficiently to stay on schedule.
- Communicate clearly and effectively with all crew members.
- Be adaptable and able to solve problems on the fly.
- Maintain a positive and collaborative atmosphere on set.
- Check and approve all call sheets and shooting order of the day's work.
- Watch rehearsal of scenes to be shot.
- Choose lens and composition, show to director for approval.
- Make sure composition and movement fulfill scene task.
- Work out mechanical problems with camera operator, assistant camera, dolly and crane grips.
- Set any camera-movement cues.
- Place stand-ins and rehearse, fine-tune.
- Ensure proper coverage of scenes for the editor.
- Work with assistant director on background action.
- Design lighting to show set/location to best advantage relative to story, style and dramatic content.
- Light each actor to reinforce and reveal character.
- Make sure the mood and tone of light help tell the story.
- Design light for a minimum reset between set-ups.
- Utilize stand-by painter for control of:
 - Highlights
 - Shadows
 - Aging
 - Dusting down of sets and props
-
- Set and match light value, volume, color and contrast of each setup (exposure).
- Set any lighting cues:
 - Dimmers
 - Spot lights
 - Color changes
 - Any pre-programming
-
- Work out any sound problems.
- Work out any problems with other departments.
- Check, set, and approve all stunts with the stunt coordinator.
- Set any additional cameras required for stunts.
- Double-check safety with all concerned.
- Show shot to director to make any final changes.

- Get actors in for final mechanical rehearsal; solve any outstanding problems.
- Photograph scenes.
- Approve or correct takes.
- Check parameters and reset for the next take.
- Shoot any plates.
- Shoot any video playback material.
- Move to the next setup.
- Define the first setup in the morning and after lunch.
- Make sure stills are taken of scenes.
- See that “making of” and/or EPK crews get needed footage.
- Make sure the script supervisor has any special camera or lighting notes.
- Check film raw stock inventory. (Specific to film projects)
- Try to shoot up short ends. (Specific to film projects)
- Check that the camera logbook is being kept up to date.
- Complete day’s work.
- Discuss the first setup for the next day.
- Ensure camera, electrical and grip crews get all copies of equipment rental or purchase invoices and approve before accountants pay vendors.
- Take care of any future or ongoing production issues.
- Answer any questions about future problems.
- Visit production manager and producer at the end of the day.
- Check for the return of all unused equipment.

POST-PRODUCTION

- Conduct color grading sessions with a colorist.
- Supervise film or digital transfer to various formats.
- Approve all optical and digital effects composites.
- Approve final deliverables.
- Attend screenings and promotional events.
- Call in for the lab report. (Specific to film projects)
- View the previous day’s work in projected dailies with the director, producer, editor, and camera crew.
- Discuss and approve dailies.
- Consult with makeup, wardrobe, production designer, and assistant director about dailies.
- View, discuss, correct, or approve second unit or effects dailies.
- Order reprints if necessary. (Specific to film projects)
- Photograph and approve any additional scenes, inserts, special effects, or second-unit footage.
- Time and approve a trailer for theaters and TV.
- Time the picture and retime until correct.
- Approve final answer print and show to director for approval. (Specific to film projects)
- Approve: (Specific to film projects)

- Interpositive (IP)
- Internegatives (IN)
- Release prints
- Show prints from the original negative
- All blowups or reductions
-
- Supervise and approve film or digital transfer to electronic or film media (Hi-Def, NTSC, PAL, Secam masters, digital intermediates, archival masters, etc.)
- Supervise and approve all transfers to and from digital intermediates (DI).
- Supervise and approve all letterbox, pan and scan, or reformatting of film.
- Supervise and approve tape-to-tape color correction and VHS, DVD, digital projection media, etc.
- Show electronic transfers to director for approval.
- Do any publicity:
 - Newspaper
 - Magazine
 - Internet
 - Radio
 - TV
 - DVD commentary
 - Etc.
-
- Be available for any future reissue, archival reprint or electronic transfer of film.

REMEMBER

- Always maintain clear and open communication with the director and other department heads.
- Be prepared for unexpected challenges and be adaptable to changes.
- Prioritize safety on set for both crew and talent.
- Continuously learn and refine your craft by reading cinematography books, watching films and commercials, and listening to podcasts.
- Teach beginning actors movie technique (hitting marks, size of frame, lenses, etc.). (Specific to narrative projects with less experienced actors)
- Train camera crew for next job up the ladder.

QUESTIONS

- Are we shooting on film or digital?
- Camera Gear - Freddie and Matt rocketjump
- G&E gear - van, from where, who drives
- Camera Cart
- BUDGET for RENTALS
- What is the budget for camera and G&E rentals?
- What kind of support systems will be required? (dollies, sliders, gimbals, Steadicam, crane, car rigging, etc.)
- What are the post-production specifications? (resolution, frame rate, codec, LUTs, proxies, deliverables)
- Will there be any VFX elements?
- Who is the editor, and what are their preferences?
- What are the travel and accommodation arrangements if shooting on location?
- What are the COVID-19 protocols on set?
- How many cameras?
- What is the offered kit fee?
- What is the expendables budget?
- Will any positions be combined?
- What additional personnel will be hired by production?
- Will there be VTR?
- If non-union, is the prep rate the same as the shoot rate?
- Will all personnel be paid to prep?
- How many personnel days are allocated to prep?
- Is there an opportunity to rent personal gear?
- Has the vendor been chosen?
- What size truck/vehicle will transport the camera package?
- Will truck/vehicle accessories (locks, ratchet straps, e-track with D/O rings, air tank, shelves) be provided?
- What are the COVID protocols?
- If non-union, will there be testing to be cleared to work and what is the stipend being offered?
- Find out DIT, Post Supervisor and VFX contacts.
- Find out if Stock footage will be used?
- Are we self driving?
